RAILWAYS (in alphabetical order of location)

The following black and white photographs are available from Hugh Davies, 32 Charterhouse Road, Godalming, Surrey GU7 2AQ. For current prices and details of many other lists available please see Leaflet PL. Please always send a large, stamped, addressed envelope.. Postcard size prints are normally available from stock. Larger size prints are only made against specific orders.

To help you to identify new additions and corrections to the previous issue of this list all such entries are marked with an asterisk to the right of the Ref. No. The asterisk does NOT form part of the Ref. No. and should not be used when ordering.

All photographs are taken by Hugh Davies and other members of the Railway Enthusiasts' Club (the REC) between 1946 and 1968 and the great majority have never been published. Indeed we shall be continuing to identify negatives, many thousands of them, over the next few years - negatives that have never before been printed, let alone published - so if you don't see what you want here, please keep in touch. What you require may feature in a future amendment or a new subject list.

This list and further information is available on our website www.photosfromthefifties.co.uk

ARDROSSAN

<i>Ref number</i>	<i>Description</i>	<i>Date taken (where known)</i>
-------------------	--------------------	-------------------------------------

7243A	Ardrossan (Montgomerie Pier Station) former Caledonian Railway, looking outwards from the buffer stops, with a nine-car DMU (three triples of what later became class 107) in the right-hand platform. This station was never used for normal passenger services as such: Ardrossan North Station, about a quarter of a mile away, served the town and closed when the line from Uplawmoor closed to normal services in 1932 but boat trains continued to run to Montgomerie Pier in connection with sailings to Brodick (Arran), Belfast and the Isle of Man. After the war the Arran sailings were concentrated on Winton Pier (the former GSWR terminus), but Montgomerie Pier was retained for the Manx and Irish traffic, via a new spur at Stevenson which allowed trains to run from either Glasgow Central or St. Enoch via Paisley. The official closure date of Montgomerie Pier was 6 May 1968, but the last train actually ran on 25 September 1967

YOUR HELP WILL BE GREATLY APPRECIATED -- If you can identify the locations in unidentified pictures in any of my lists (including the above) do please write and let me know. If you are the first with the correct information you will be credited with the price of the print that you purchased. All these pictures were taken about 50 years ago and regrettably we didn't keep notes of all travels at the time. So by helping with identifications you will not just be helping me but all the other users of this service. Many thanks.
